Jibin Kunjumon

Backend Engineer & AI/ML Developer | FastAPI, Python | Building Financial Sentiment Analysis Systems | LLM Integration Specialist
India

Summary

Backend Engineer & AI Developer specializing in intelligent systems powered by Large Language Models, multi-agent workflows, and production-grade backend architectures. Currently building TickerPulse, a financial sentiment analysis platform processing real-time news through a 6-stage AI pipeline (ingestion → FinBERT → validation → anomaly detection → alerts → GPT-4 summaries). At PM Accelerator and Bayerntek, I design and implement end-to-end AI systems — from architecting FastAPI backends and PostgreSQL databases to integrating transformer models, LangGraph multi-agent planning, and GPT-powered reasoning engines.

Technical Expertise:

Backend Engineering: FastAPI, PostgreSQL, RESTful APIs, JWT authentication, microservices architecture, Docker
AI/ML Integration: FinBERT sentiment analysis, OpenAI GPT-4, LangGraph, RAG pipelines, prompt engineering
Data Engineering: Real-time data pipelines, vector databases (ChromaDB), embeddings, anomaly detection (Z-score)
System Design: Database optimization, API development, authentication systems, scalable architectures

What I Build:

I create production-ready systems that combine robust backend engineering with cutting-edge AI. From designing secure authentication APIs to deploying multi-agent workflows, I turn AI concepts into working features that deliver measurable business value.

Proven Track Record:

- ✓ Multi-stage AI pipelines with validation and anomaly detection systems
- ✓ Financial data processing with statistical analysis and real-time monitoring

- ✓ Secure user management systems with JWT and watchlist APIs
- ✓ Autonomous research assistants using LangGraph for complex task orchestration
- ✓ Discord RAG chatbots with Azure OpenAI and comprehensive evaluation metrics

I thrive on solving complex problems, architecting clean backend systems, and building intelligent automation tools that make an impact. Whether it's integrating LLMs into financial applications or designing agentic workflows, I deliver scalable solutions that work. Open to opportunities in: AI Engineering, Backend Development, LLM Applications, Multi-agent Systems, and Full-Stack AI Products.

Experience

PM Accelerator

AI Developer

September 2025 - Present (4 months)

United States

- Contributed to the development of AI-powered products by building end-to-end pipelines.
- Integrated large language models (LLMs) to enhance product features and functionality.
- Collaborated with cross-functional teams to ensure timely delivery of product features.

Bayerntek

AI Consultant

November 2024 - Present (1 year 2 months)

Collaborate with clients to define chatbot requirements and user journeys.

Design conversational flows and integrate NLP models for accurate responses.

Develop and deploy chatbots across platforms, ensuring seamless integration.

Implement key features like account verification and real-time billing support.

Monitor chatbot performance and optimize functionality using analytics.

Ensure compliance with privacy and security standards in AI solutions.

Research and implement advanced AI features, including multilingual support.

GALTech Technologies Pvt. Ltd

AI Engineer Intern

September 2024 - August 2025 (1 year)

Kerala, India

Assisting in developing AI models and backend integration for real-world applications.

Enhancing session management and user interaction for AI chatbots.

Freelance

Freelance Copywriter & SEO Specialist

July 2024 - November 2024 (5 months)

LBW Chartered Accountants

6 months

Graduate Accountant

June 2014 - November 2014 (6 months)

Geelong

Graduate Accountant

June 2014 - November 2014 (6 months)

Deakin University

Casual General

June 2013 - November 2014 (1 year 6 months)

Geelong

Casual Web Support Officer

eSolutions, Deakin University (www.deakin.edu.au/its)

- Responsible for contenting editing the web page of all areas of University to deliver the quality.
- Working with web tool (Squiz matrix) for content editing, design and management of the web pages.
- Completing all tasks in a reliable and accurate manner.
- Constant communication with the team leader and the Clients (mostly by emails) for the completion of the task

Melbourne River Cruises

Hospitality Staff

November 2011 - April 2013 (1 year 6 months)

Banana Alley, Melbourne

Melbourne River Cruises (www.melbcruises.com.au)

- Providing exceptional customer service to a wide range of clientele.
- Utilising excellent communication skills to meet a variety of requests.
- Operating cash register and responsible for cash handling.

- Ability to work as part of a team or autonomously as required.
- Collaborating with team members during peak times to ensure consistent service.
- Completing all assigned tasks in an accurate and timely manner.
- Adhering to all policies and procedures.

Deakin University

1 year 1 month

Post-Graduate Drop-in-station mentor

July 2012 - January 2013 (7 months)

Deakin University, Burwood

Postgraduate Drop-in-station Mentor

Business & Law – Student Administration, Deakin University (www.deakin.edu/buslaw/drop-in)

- Providing general reception duties.
- Liaise with students, colleagues and senior managements on a daily basis.
- Responsible for develop and manage client relationship.
- Managing communication, making appointments and organizing meetings.
- Established working relationship with the librarian, Business/Law student adviser and faculty lecturers which increased the awareness of the Postgraduate Drop-in-station.

Casual On Campus

January 2012 - October 2012 (10 months)

Deakin University, Burwood.

Jobshop, Deakin University (www.deakin.edu.au/studentlife/careers)

- Providing general administrative support as required.
- Responsible for good customer support.
- Ability to work as part of a team or autonomously as required.
- Maintaining good relationships with other team members and students.
- Displaying effective time management skills.
- Executing all duties in an organized and efficient manner.

Education

Deakin University

Master of Professional Accounting and Master of Commerce, Accounting and Business/Management · (2011 - 2013)
